In the advertisement Climate change a promise from Apple, the narrator is speaking about Apple’s plans for climate change to an infant that is sleeping. They must have chosen an infant because of the age because, by the time he was 10 years old, it wouldn’t have known the old apple.

In the advertisement Reduce Methane Whoppers, they made a music video to show their message. In that music video, they started by showing cows, then they went into showing the people dressed as scientists to show them researching how to get rid of the methane.

In the advertisement Stronger Together, A company donated sticky notes in turn they used them to make an art piece on the wall in the shape of a rainbow with words in it to honor gay pride. They then showed groups

of people getting pictures together at the wall to show everyone supporting it.

The fourth advertisement United we Stand was a group of people sitting together and talking, in the ad, it said they were actors and performers. They were all talking about how they supported each other and asked for others to join them.

In the ad Reduce Methane Whoppers how do they know that the new feed that reduces or eliminates the methane in cow’s gas doesn’t have any adverse effects on the quality of the meat, and or milk from the cow?
